Rick -

Oren has submitted the missing pages from the Kiewit Permit and the pages have been scanned and added.

I sent out a letter for the Yellow Hammer on Wednesday - you need to submit the calculated bond.

The Herat permit is not complete until all paper work is completed (hence the reason Jerry can move forward....if he finishes the action first...he is aware that you have started the paper work, but not finished the transfer of the Herat (and the Kiewit permit is also not completed either)). The Herat permit is in the name of American Consolidated Mining Co. and the replacement pages have not been submitted. The next problem is the map for the Herat notes "plus or minus" 2 acres and your bond is for 5 acres the other 3 "plus or minus" acres has to be shown on the map. The next problem is the Division needs to know if you will have any facilities or processing on the Herat permit and where you will put the growth medium. the next problem is the MR-RC has never been received. The letter will be given to Paul today.

Your are correct - one approved permit can not be on top of another permit. It is in your best interest to finish all the permitting actions.

I do have 3 years of pictures from the Herat and nothing has been clean up at the Herat.

Leslie

Do you have what you need?

Are you making progress?

Are there issues we need to be working on?

Rick Havenstrite

Desert Hawk Gold Corp

PS-- FYI--- I got in trouble again last week-- this time with Bill Moeller and Jerry North as I discouraged their efforts to plan an event (another Small Mine Permit) inside our current "Large Mine Permit" area at the Clifton Shears.. Jerry indicated you *said* it would be no problem but we have spent a lot of time to clean up the misc and it seemed like a problem to me.
